

## Fund Profile

The Fairtree Market Neutral SNN QI Hedge Fund was launched in 2003. The fund's portfolio typically spans all South African equity sectors, including financials, industrial, retailers and resources. The majority of exposure will be in the top 100 listed equities on the JSE, by market capitalisation. Our portfolio construction approach assigns exposures into different risk buckets; namely low risk intra-sector pairs, cross-sector pairs, themes and absolute value. Intra-sector pairs typically dominate the portfolio and position sizes rarely exceed 10%. Leverage rarely exceeds 2.5 times and net exposure, once beta adjusted is generally close to zero. The fund aims to return Cash plus 5 - 7% annually, on a rolling 3 year basis.

## Investment Strategy

The portfolio is focused on extracting alpha returns from South African equity markets. These returns are accessed through a fundamental understanding of South African stock vis-à-vis economic growth and broad economic themes as well as medium and long term relative valuation opportunities.

## CUMULATIVE PERFORMANCE SINCE INCEPTION

Fund Source: Sanne Fund Services SA (Pty) Ltd as at May 2022

\*The inception date for the portfolio is 1 November 2003. The historical performance figures until the end of 31 October 2016 reflect performance achieved prior to CISCA regulation. The portfolio has been transitioned under CISCA regulations on 1 November 2016 and has since been managed as a regulated product. The annualized total return is the average return earned by an investment each year over a given time period, since date of the launch of the fund. Actual annual figures are available from the manager on request. The highest and lowest 1 year returns represent the highest and lowest actual returns achieved during a 12 month rolling period year since the original launch date of the portfolio. The performance figures given show the yield on a Net Asset value ("NAV") basis. The yield figure is not a forecast. Performance is not guaranteed and investors should not accept it as representing expected future performance. Individual investor performance may differ as a result of initial fees, time of entry/actual investment date, date of reinvestment, and dividends withholding tax. Performance is calculated for a lump sum investment on a Net Asset Value basis. The performance figures are reported net of fees with income reinvested.

**Risk Profile**

Risk Level	Low	Low-Medium	<b>Medium</b>	Medium-High	High
------------	-----	------------	---------------	-------------	------

The risk category shown is not guaranteed and may change over time. The lowest category does not mean the investment is risk free. There may be other special areas of risk relating to the investment including liquidity risk, credit risk, market risk, and settlement risk. Sanne Management Company (RF) (Pty) Ltd, ("the manager"), and the investment manager do not render financial advice. Our risk indicator does not imply that the portfolio is suitable for all types of investors. You are advised to consult your financial adviser.

**Portfolio Valuation & Transaction Cut - Off**

Portfolios are valued monthly. The cut off time for processing investment subscription is 10:00am on the last business day of the month prior to enable processing for investment on the first business day of the next month. Redemptions are subject to one calendar months' notice.

**Total Expense Ratio**

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER.

### Market Commentary

Global market sentiment has oscillated between a buy-the-dip mentality and the sell-the-rally rhetoric. Global multiples have de-rated, but slowing economic conditions still need to find its way into earnings estimates. Rate expectations have risen significantly while results from bell-weather corporates have indicated that consumer demand might be waning. At the same time, some think that rate expectations have perhaps peaked and might assist valuations. The uncertain economic outlook meant markets were volatile in May. South Africa was no exception.

The fund was cautiously positioned, with a preference for self-help opportunities and defensive names, as economic data deteriorates and pressure on consumers start to build. Fuel prices, food inflation and rising interest rates will weigh on the consumer.

The fund benefitted from its position in self-help and defensive Remgro (+5.7%), while also benefitting from its short position in Tiger Brands (-7.7%) who will find it difficult to pass on input cost pressures to a consumer that is under pressure.

Within the defensive consumer staples space, the fund saw mixed results. The long position in Spar (-7.3%) hurt the fund, while short positions in Woolworths (-6.3%) and Dischem (-8.1%) benefitted the fund. We continue to find value in Spar, and like its defensive characteristics. On the other hand, we remain concerned about the competitive environment for Woolworths, as well as the risk of downtrading in tough economic conditions. With global valuations coming down, we continue to see Dischem's valuation as vulnerable.

Our long exposure to self-help industrials KAP (-8%) and Aspen (-5%) hurt the fund. 2022 is on course for a record year of loadshedding, which both weighs on confidence and costs. Aspen is a defensive name, but the market has lost faith in management's promise to fill its excess manufacturing capability. We view the latter as additional optionality. Partly offsetting the losses above, was the fund's short position in Vodacom (-3.3%), where we believe the market is yet to price in the increased risk profile post recent acquisitions.

With the SARB raising interest rates, the SA Banks (+5.9%) saw gains in anticipation of the positive endowment benefit. The fund was net-short SA Banks, which hurt the fund. We felt the valuations largely already reflected the rates outlook. Short positions in Firstrand (+5.7%) hurt the fund, while our preferred bank exposure through ABSA (+6.9%) offset some of the net-short banking losses.

Elevated geopolitics and elevated inflation, mean real yields remain negative, even as rates are rising. This should continue to support gold (-2.7%). We continue to view gold exposure favourably, with the metal largely unchanged over the period. Our preferred exposure to the metal was Goldfields (-29.7%), which hurt the fund. Goldfields announced a merger with a Canadian gold mine, which was viewed as very dilutive to Goldfield's shareholders, which hurt its share price and the fund. We share the market's concern regarding the merger, but feel the market more than priced in the deal's dilution.

Uncertainty is creating disconnects to fundamentals. Furthermore, earnings expectations still need to price in a slowing economic backdrop, while rate expectations potentially already peaked, which might offset some of valuation impact of earning downgrades. These opposing forces will create volatility, creating opportunities for the agile fund.

*Please Note: The above commentary is based on reasonable assumptions and is not guaranteed to occur.*

## Glossary

<b>Net Asset Value (NAV) :</b>	Means net asset value, which is the total market value of all assets in a portfolio including any income accruals and less and deductible expenses such as audit fees, brokerage and service fees.
<b>Annualised Return :</b>	Is the weighted average compound growth rate over the performance period measured.
<b>Highest &amp; Lowest Return :</b>	The highest and lowest rolling twelve-month performance of the portfolio since inception.
<b>Total Expense Ratio (TER) :</b>	Reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.
<b>Transaction Costs (TC) :</b>	Is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns.
<b>Total Investment Charges (TIC) :</b>	Should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager.
<b>Total Investment Charges (TIC%) :</b>	= TER (%) + TC (%): The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).
<b>Standard Deviation :</b>	The deviation of the return of the portfolio relative to its average.
<b>Drawdown :</b>	The greatest peak to trough loss until a new peak is reached.
<b>Sharpe Ratio :</b>	The ratio of excess return over the risk-free rate divided by the total volatility of the portfolio.
<b>Sortino Ratio :</b>	The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.
<b>Correlation :</b>	A number between -1 and 1 indicating the similarity of the dispersion of returns between the portfolio and another asset or index with 1 being highly correlated, -1 highly negatively correlated and 0 uncorrelated.
<b>Value at Risk (VaR) :</b>	Value at risk is the minimum loss percentage that can be expected over a specified time period at a predetermined confidence level.
<b>Leverage/Gearing :</b>	The use of securities, including derivative instruments, short positions or borrowed capital to increase the exposure beyond the capital employed to an investment.

## Fund Risk

<b>Leverage Risk :</b>	The Fund borrows additional funds, trades on margin or performs short sale trades to amplify investment decisions. This means that the volatility of a hedge fund portfolio can be many times that of the underlying investments due to leverage on a fund.
<b>Derivative Risk :</b>	Derivative positions are financial instruments that derive their value from an underlying asset. Derivatives are exposed to implicit leverage which could result in magnified gains and/or losses on the portfolio.
<b>Counterparty Credit Risk :</b>	Counterparty risk is a type of credit risk and is the risk of default by the counterparty associated with trading derivative contracts. An example of counterparty credit risk is margin or collateral held with a prime broker.
<b>Volatility Risk :</b>	Volatility refers to uncertainty and risk related to size of change of an instrument or portfolio. It is a statistical measure of the dispersion of returns for a given security or market index. Volatility is proportional to the directional exposure of a portfolio and is measured by Value at risk (VaR) which is a statistical technique used to measure and quantify the level of volatility.
<b>Concentration and Sector Risk :</b>	A large proportion of total assets invested in specific assets, sectors or regions. Concentrated positions or concentrated sectors in a portfolio will material impact the returns of the portfolio more so than diversified portfolios.
<b>Correlation Risk :</b>	A measure that determines how assets move in relation to each other. Correlation risk arises when the correlation between asset-classes change. Correlation risk also arises when the correlation within an asset-class changes. Examples of correlation within asset classes include equity pairs trading, fixed income curve trading and commodities pairs trading.
<b>Equity Risk :</b>	Applies to investment in shares or derivatives based on shares. The market price of shares varies depending on supply and demand of the shares. Equity risk is the risk of loss due to the drop in the market price of shares. Equity risk can either be systematic risk which is risk to the entire market based on political and economic indicators or unsystematic risk which is company specific and includes risk relating to company profits, future prospects and general consensus on the company or sector.

## Mandatory Disclosures

Investment Manager: Fairtree Asset Management (Pty) Ltd, Registration Number: 2004/033269/07 is an authorised Financial Services Provider (FSP25917) under the Financial Advisory and Intermediary Services Act (No.37 of 2002), to act in the capacity as investment manager. This information is not advice, as defined in the Financial Advisory and Intermediary Services Act (No.37 of 2002). Please be advised that there may be representatives acting under supervision. Physical Address: Willowbridge Place, Cnr. Carl Cronje and Old Oak Road, Bellville, 7530. Postal Address: PO Box 4124, Tyger Valley, 7536. Telephone Number: +27 86 176 0760. Website: www.fairtree.com.

Management Company: Sanne Management Company (RF) (Pty) Ltd (the "Manager"), Registration Number: 2013/096377/07, is authorised in terms of the Collective Investment Schemes Control Act (CISCA) to administer Collective Investment Schemes (CIS). Physical Address: Pier Place, Heerengracht Street, Foreshore, Cape Town, South Africa. Telephone Number: +27 21 202 8282. Website: www.snnmco.com, Trustee: Firstrand Bank Limited, (acting through its RMB Custody and Trustee Services Division) 3 Merchant Place, Ground Floor Corner Fredman and Gwen Streets, Sandton, 2146 Telephone +27 87 736 1732.

Collective Investment Schemes are generally medium- to long-term investments. The value of participatory interests (units) may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investments are traded at ruling prices and can engage in scrip lending and borrowing. A schedule of fees, charges and maximum commissions, as well as a detailed description of how performance fees are calculated and applied, is available on request from Sanne Management Company (RF)(Pty) Ltd ("the Manager"). The Manager does not provide any guarantee in respect to the capital or the return of the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressure and in such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. Commission and incentives may be paid, and if so, are included in the overall costs. The Manager may close the portfolio to new investors in order to manage it efficiently according to its mandate. Prices are published monthly on our website and local media. Additional information, including key investor information documents, minimum disclosure documents, as well as other information relating to the basis on which the manager undertakes to repurchase participatory interests offered to it, and the basis on which selling and repurchase prices will be calculated, is available, free of charge, on request from the Manager. The value of an investment is dependent on numerous factors which may include, but not limited to, share price fluctuations, interest and exchange rates and other economic factors. Where foreign investments are included in the portfolio, performance is further affected by uncertainties such as changes in government policy, political risks, tax risks, settlement risks, foreign exchange risks, and other legal or regulatory developments. The Manager ensures fair treatment of investors by not offering preferential fee or liquidity terms to any investor within the same strategy. The Manager is registered and approved by the Financial Sector Conduct Authority under CISCA. The Manager retains full legal responsibility for the portfolio. FirstRand Bank Limited, is the appointed trustee. Fairtree Asset Management (Pty) Ltd, FSP No. 25917, is authorised under the Financial Advisory and Intermediary Services Act 37 of 2002 to render investment management services.
